Create an R Instance

Create an R Instance

Description

This algorithm creates an R instance that is usable from the CIShell environment.

In order for this algorithm to work, you must already have R installed on your computer.

Menu Path

R -> Create an R Instance

Output

An R instance will be added to the datamanager view in the right hand panel of the tool.

Usage Hints

When the algorithm is started, it will prompt for the location of the directory that contains the RGui executable (in Windows, this is `Rgui.exe`). Click on `browse` to locate this directory on your computer. In Windows, this location might be `C:\Users\username\Programs\R-2.14.1\bin\i386`
