

Run Rgui

Run Rgui

Description

This algorithm opens the RGui for an already created R instance.

The R instance can be created using [Create an R Instance](#).

Menu Path

R -> Run Rgui

Output

An RGui window will appear outside of the tool.

Usage Hints

Select an R Instance created using [Create an R Instance](#) from the data manager and activate the algorithm from the menu.

To use tables from the tool in R, see [Send a Table to R](#); to use tables from R in the tool, see [Get a Table from R](#).

The RGui must be closed and reopened before table names imported using [Send a Table to R](#) will be available in R.
